

## EFFECTIVE SHARED CARE AGREEMENT OF AZATHIOPRINE FOR THE TREATMENT OF INFLAMMATORY SKIN DISEASE

### RESPONSIBILITIES and ROLES

Specialist responsibilities	
1	Discuss the benefits and side effects of treatment with the patient.
2	Check for possible drug interactions with azathioprine and patients regular medication. Avoid prescribing interacting drugs.
3	Assess likelihood of compliance.
4	Ensure patient is given sufficient information about their treatment.
5	Perform all baseline tests (including FBC, U&Es, LFTs and TPMT assay).
6	Initiate and stabilise treatment with azathioprine. Stabilisation will usually take at least 12 weeks.
7	Supply medication until care is transferred to GP.
8	Ask the GP whether he or she is willing to participate in shared care and explain the intention to share care with patient/carer and obtain consent.
9	Monitors appropriately as stated on the monitoring requirement.
10	Inform GP of the dose to be prescribed, any changes in dose, when to stop treatment and when to refer the patient back to specialist.
11	Periodically review the patient's condition and communicate promptly with the GP when treatment is changed.
12	Ensure GP has access to blood results for information.
13	Monitor for side effects and report adverse events to the MHRA and GP where appropriate.
14	Inform GP if patient does not attend specialist appointments and action to be taken.
15	Have a mechanism in place to receive rapid referral of a patient from the GP in event of deteriorating clinical condition.
16	Ensure that clear backup arrangements exist for GPs to obtain advice and support.
General Practitioner responsibilities	
1	Reply to the request for shared care as soon as possible.
2	Prescribe azathioprine at the dose recommended once patient is established on treatment.
3	Ensure compatibility with other concomitant medication.
4	Adjust the dose as advised by the specialist.
5	Contact the specialist if you suspect the patient is not complying with their medication.
6	Check for possible drug interaction when prescribing new medication and avoid prescribing interacting drugs.
7	Stop treatment on the advice of the specialist or immediately if an urgent need to stop treatment arises.
8	Refer the patient to the specialist if his/her condition deteriorates.
9	Report any suspected adverse events to specialist team and any severe adverse events to MHRA.
Patient's / Carer's role	
1	Take azathioprine as recommended by specialist.
2	Report to the specialist or GP if he / she does not have a clear understanding of the treatment.
3	Request repeat prescriptions from the GP at least 5 days before the next supply is needed.
4	Attend scheduled appointments with specialist, GP and for monitoring.
5	Share any concerns in relation to treatment with GP or specialist.
6	Inform specialist or GP of any other medication being taken, including over-the-counter products
7	Inform specialist or GP if you feel you are having problems taking your medication or have stopped taking it.
8	Report any adverse effects to the specialist or GP.
